ABOUT ME

I am a sophomore engineering student with experience in web3, blockchain, react, MERN stack, UI/UX, web development, agentic AI, and machine Learning. I am currently honing my skills in Data Structures and algorithms and full stack development

EDUCATION

Bangalore Institute of Technology | 2024 - present

Bachelor of Intelligence in Artificial Intelligence and Machine Learning

CGPA : 8.6

Mahesh Gowhtama Siddartha PU College | 2022 - 2024

Physics, Chemistry, Mathematics, Computer Science

Aggregate : 93.5%

St. Antony's High School

High School

Aggregate : 96.8%

PROJECTS

EV SMART GRID OPENENV

Web development, Reinforcement Learning, Python, Artificial Intelligence. LLM, Docker

Built an EV charging and V2G optimization simulator for Indian residential grids using FastAPI and OpenEnv, modeling dynamic tariffs, grid outages, and battery degradation.

ALGO MINT

Blockchain, Web#, Full stack development, React, Tailwind CSS, DevOps

Designed and deployed a production-ready system integrating smart contracts, wallet-based transactions, and a React frontend to support decentralized investment, revenue distribution, and secondary market trading.

VAIDYA

Backend Developement, AI integration, Voice interface, Emotion aware AI system

Built a voice-first healthcare assistant integrating Google Gemini and Qdrant to deliver real-time, personalized health guidance with emergency detection and emotion-aware responses.

SKILLS

- DSA
- Flutter
- Web3
- MERN
- Data Analysis
